<u>4</u>	<u>Diagram</u>

1. Introduction Of Project

1. What is a Placement Management System?

A Placement Management System (PMS) is a web application used by colleges to manage placement activities online. It helps students, placement officers, companies, and administrators work together on a single platform. The system allows colleges to manage student information, job opportunities, company details, interviews, and placement results easily and efficiently.

2. Why colleges need it?

Many colleges still manage placement activities using spreadsheets, paper records, WhatsApp groups, and emails. This becomes difficult when hundreds or thousands of students participate in placement drives.

- **Benefits for Colleges :**
 - A. Data Management
 - B. Faster Placement Process
 - C. Better Communication
 - D. Accurate Reporting
 - E. Reduced Manual Work

3. Current placement process problems.

Problems :

- Manual Student Data Management
- Eligibility Verification Takes Time
- Poor Communication
- Resume Management Issues

4. How your system solves them.

Our Placement Management System makes the placement process easier and faster by managing all placement-related activities on a single platform. It stores student and company information in one place, automatically checks student eligibility for job opportunities

5. System Description

- a. Student / Company Registration
- b. Online Job Application
- c. Resume Upload

- d. Student and Company Data Management
- e. Placement Records Management

2. Project Details

<u>Field</u>	<u>Details</u>
<u>Project Title</u>	<u>Placement management system</u>
<u>Development Software</u>	<u>Visual Studio</u>
<u>Front End</u>	<u>Vue.js</u>
<u>Backend</u>	<u>Mysqli DB</u>
<u>Academic Year</u>	<u>2026 - 2027</u>
<u>Developed By</u>	<u>Vinay Bosamiya</u>
<u>Submitted To</u>	<u>Saurashtra University</u>
<u>Documentation Tool</u>	<u>Microsoft Word</u>
<u>Operating System</u>	<u>Windows</u>
<u>Language</u>	<u>PHP</u>

3. System Design

- **System Requirements**

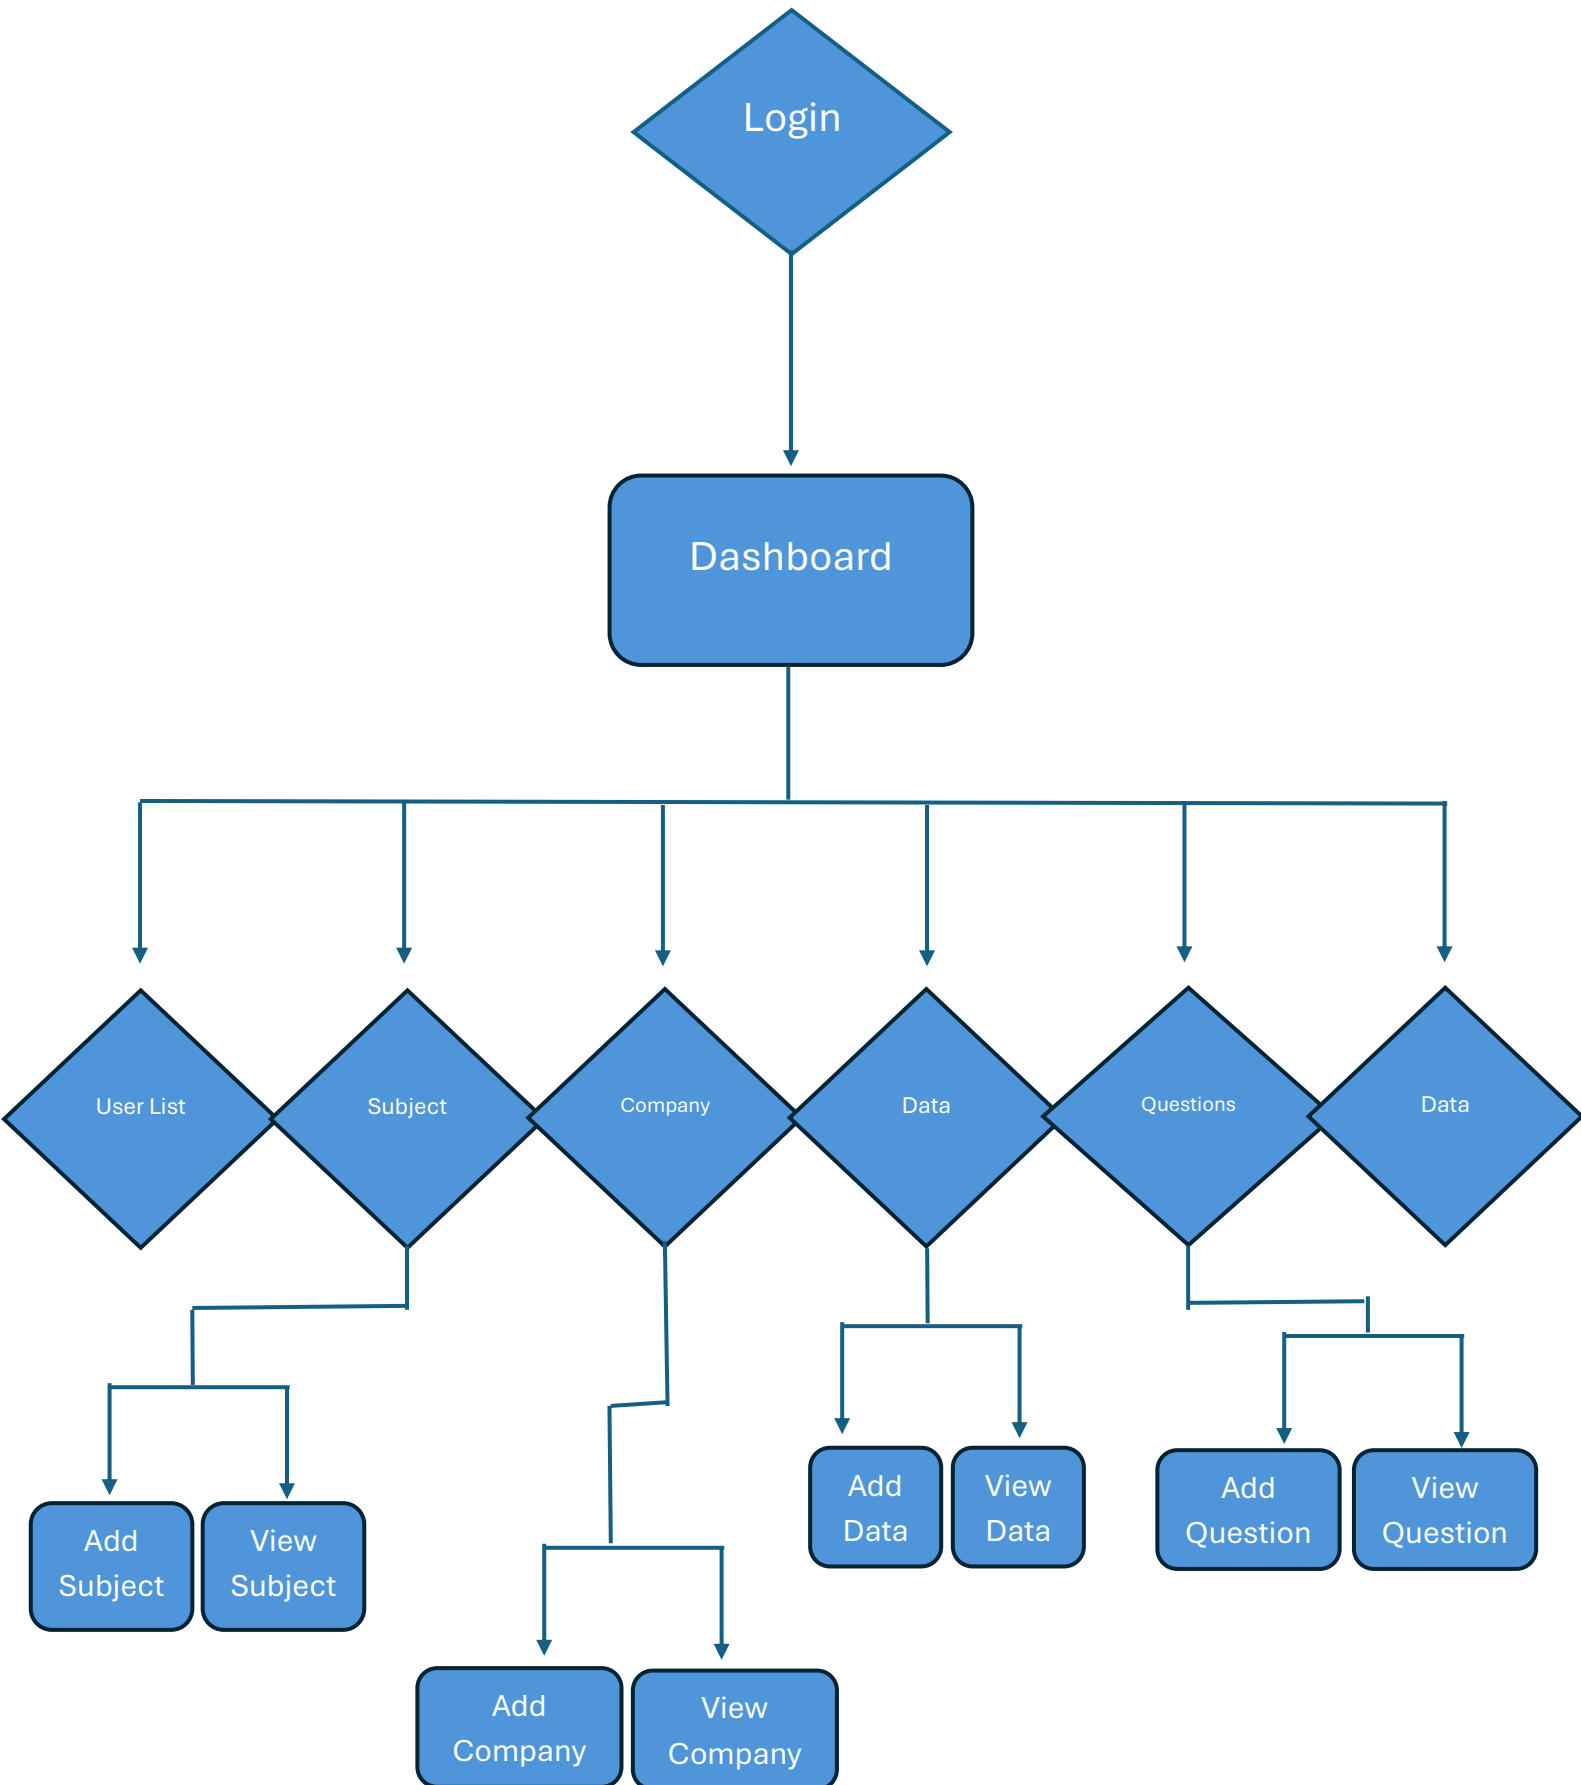

Requirement	Specification
Server Type	Windows Based
Services Required	Windows Operating System
Language	Php
Framework	Vue.js

Requirement	Specification
Operating System	Windows 7 or Higher
RAM	2 GB or Higher

Requirement	Specification
ROM / HDD / SSD	120 GB or Higher

4. Diagram
